Education

Balaji Institute of Technology & Science , Bachelor of Technology in Computer Science(CSD)CGPA-7.15	2022 – 2026
Sree Sai Junior College , Intermediate (MPC)-47%	2020 - 2022
Teja International High School , 10 th Grade -97%	2019 - 2020

technical Skills

Languages: Python(Intermediate), Java(Basic)

Databases: MySQL

Data Visualization: Tableau, Machine Learning

Web Technologies: HTML,CSS, JavaScript

Projects

Title : Inventory Demand Forecasting Using Machine learning

Developed a model to predict future product demand using historical sales and stock trends. Helped optimize inventory planning by reducing overstock and stock-out risks through accurate forecasting.

Title: Personalizing Recipe Recommendation Using NLP Models

Built an NLP-based system to recommend recipes based on user preferences, ingredients, and dietary choices. Used text processing and similarity models to personalize suggestions and improve recommendation relevance.

Experience/Internships

Data Science Project-Based Virtual Internship

AICTE

Participated in this virtual internship where I was introduced to the basics of Data Science.

This experience has provided me with a fundamental understanding of Data Science using Python and their applications along with practice labs.

Certifications

-
- python programming from code tantra HTML&CSS Bootcamp Certification

I hereby assert that the information given above is exact to the best of my knowledge and belief.
